DAMAGE EFFECTS

Damage effects are special properties of a weapon. If at least one Effect symbol is rolled on the damage dice, all damage effects listed for that weapon trigger. Some effects depend on the number of Effect symbols rolled, as detailed in each effect's description.

- **ARC:** For each Effect rolled, one additional target within Close range of the primary target is automatically hit. Each secondary target takes half the damage rolled. Unlike Burst, Arc does not consume additional ammunition.
- **BREAKING:** For each Effect rolled, permanently reduce the target's cover dice by 1. If the target has no cover dice, instead reduce the Damage Resistance of the hit location by 1 for the weapon's damage type (e.g., Physical damage reduces Physical DR, Energy damage reduces Energy DR).
- **BURST:** The attack may hit one additional target within Close range of the primary target for each Effect rolled. Each additional target consumes 1 additional shot of ammunition from the weapon.
- **FREEZE:** Opponents struck by this attack are frozen if the number of Effects rolled equals or exceeds half the target's END (or half Body for creatures). A frozen target cannot take actions on its next turn.
- **PERSISTENT:** If one or more Effects are rolled, at the end of its next and subsequent turns the target suffers damage equal to the weapon's rolled damage for a number of rounds equal to the number of Effects rolled (for example, rolling 5 damage including 2 Effects deals 5 damage per round for 2 rounds). A character may spend a major action to attempt a skill test (difficulty equal to the remaining rounds; Attribute + Skill chosen by the GM) to end the effect early. Some weapons inflict Persistent damage of a specific type shown in parentheses, such as Persistent (Poison).
- **PIERCING X:** Ignores X points of the target's Damage Resistance for each Effect rolled, where X is the rating of the weapon's Piercing effect.
- **RADIOACTIVE:** For each Effect rolled, the target also suffers 1 point of Radiation damage. This Radiation damage is totaled and applied separately after the target takes the attack's normal damage.
- **SPREAD:** For each Effect rolled, your attack inflicts one additional hit on the target. Each additional hit deals half the rolled damage (rounded down) and strikes a random hit location, even if the initial attack targeted a specific location.
- **STUN:** If one or more Effects are rolled, the target cannot take any actions (neither major nor minor) on its next turn. A stunned character or creature may still spend AP to buy additional actions.
- **VICIOUS:** The attack inflicts +1 damage for each Effect rolled.

WEAPON QUALITIES

Qualities are special rules that describe how a weapon functions and how it differs from other types of weapons.

- **ACCURATE:** If you take the Aim minor action before attacking with an Accurate weapon, you may spend up to 3 AP to add +1 damage per AP spent. If you gain bonus damage this way, you cannot also spend ammunition for bonus damage. A weapon cannot be both Accurate and Inaccurate.
- **AMMO-HUNGRY (X):** The weapon consumes ammunition at a voracious rate. Each attack spends X shots of ammunition instead of 1. Additionally, spending ammunition to add +1 damage costs X shots per bonus die (up to the weapon's Fire Rate), and other ammo-spending effects (such as Burst) likewise spend X shots per target instead of 1.
- **BAYONET:** The fitted bayonet allows the weapon to be used as a melee weapon in Reach, dealing 4 Physical damage with Piercing 1 (or 5 Physical damage with Piercing 1 when fitted with a Large Bayonet).
- **BLAST:** When attacking with a Blast weapon, you do not target a single enemy. Instead, choose a single zone you can see and make an attack skill test with a base difficulty of 2 (modified by range as normal). On a success, every creature and damageable object in that zone suffers the rolled damage. On a failure, roll only half the weapon's to determine damage inflicted on targets in the zone, and ignore the weapon's damage effects.
- **BOMBARD:** Functions like Blast, except that during the attack you may spend additional ammunition to strike extra zones. Each additional zone costs 2 ammunition and must be adjacent to the initial target zone; total extra ammunition spent cannot exceed the weapon's Fire Rate.
- **CLOSE QUARTERS:** A weapon with the Close Quarters quality does not suffer an attack difficulty increase when used within Reach of an enemy.
- **CONCEALED:** Concealed weapons are small and easily hidden on your person. Enemies do not notice a Concealed weapon unless you are holding it in your hands or they search you thoroughly and succeed at a PER + Survival test with a difficulty of 2.
- **CRANK (X):** The weapon uses a hand-cranked capacitor or multi-chamber feed rated up to X shots or charges. When attacking, you can crank or feed additional charges as specified by the weapon or modification to increase damage or shots fired per attack.
- **DEBILITATING:** The difficulty of any skill test to treat injuries inflicted by a Debilitating weapon increases by +1.
- **DELAY (X):** Equipped with a timed fuse or delay mechanism, the device does not detonate immediately. Weapons with Delay (1) detonate at the start of the first round after being thrown or primed; Delay (2) detonates at the start of the second round, and so on.

- **DISARM:** On a successful attack with this weapon, you may spend 2 AP to disarm the opponent, knocking one held weapon or item out of their grasp.
- **FUEL (X):** Requires loading the specified fuel ammunition type equal to the weapon's base damage rating before use. Whenever a complication is rolled on an attack, the weapon runs out of fuel and must be reloaded as a minor action before its next attack.
- **GATLING:** Consumes ammunition at ten times the normal rate: whenever you would spend 1 shot of ammunition, a Gatling weapon instead fires a 10-round burst. Each burst of 10 rounds spent to boost damage adds +2 (up to the weapon's Fire Rate) instead of +1 per single shot.
- **INACCURATE:** When attacking with an Inaccurate weapon, you gain no benefit from the Aim minor action. A weapon cannot be both Accurate and Inaccurate.
- **MINE:** Once placed on a surface and armed, a Mine becomes a hazardous object that detonates and inflicts damage on anyone entering Reach (and to all targets in the zone if it also has the Blast quality).
- **NIGHT VISION:** Equipped with night-vision optics designed to see clearly in low light. When you Aim with a Night Vision weapon, ignore any attack difficulty increases caused by darkness.
- **PARRY:** When an enemy attacks you in melee while you wield a Parry weapon, you may spend 1 AP to add +1 to your Defense against that attack.
- **PLACED:** The explosive is placed on a surface and armed rather than thrown, often paired with Delay (X) or a Detonator. Placing it requires a PER + Explosives test with a difficulty of 1 (or 2 if you have been attacked since your last turn). On a failure it is improperly set and fails to detonate (or triggers unpredictably on a complication).
- **RE-ROLL HIT LOCATION:** When making an attack with this weapon, you may re-roll the Hit Location die once.
- **RECOIL (X):** Generates severe recoil when fired. If the wielder's STR is lower than X, the difficulty of all attacks with the weapon increases by +1. This penalty is ignored if the weapon is held in two hands, or (if already Two-Handed) braced against a solid object or bipod.
- **RECON:** When you Aim at a target with a Recon weapon, you mark that target. The next ally who attacks that marked target may re-roll one d20 during their attack.
- **RELIABLE:** During each combat encounter, a Reliable weapon ignores the first complication you roll on a skill test using it. A weapon cannot be both Reliable and Unreliable.
- **SHREDDER:** Fits toothed blades or bayonet fittings around the muzzle so the weapon can be used in Reach as a melee weapon, inflicting Physical damage equal to the weapon's Fire Rate (Minigun) or 4 Piercing 1 Physical damage (Missile Launcher).
- **SLOW LOAD:** This weapon takes longer to reload between shots. After firing, you must spend a minor action to reload before you can fire it again.

- **SNEAK ATTACK:** Modifies sneak attacks made with the weapon: a Stealth Blade deals bonus damage on a Sneak Attack, while noisy musical weapons (such as the War Drum, Guitar Sword, and Death Tambo) increase the complication range by 1 during sneak attacks.
- **SUPPRESSED:** If an enemy cannot see you when you attack with a Suppressed weapon, they do not notice the attack unless they are the target or pass a PER + Survival test with a difficulty of 2.
- **SURGE:** Especially effective against machines, robots, and targets in Power Armor. Attacks with a Surge weapon gain the Vicious damage effect against robots, opponents in Power Armor, and other mechanical or electronic targets (such as turrets).
- **TARGETING COMPUTER:** When you Aim at a target with this weapon, the target gains no benefit from cover, and the bonus from aiming applies to your next attack on any subsequent turn during the same scene.
- **THROWN:** Thrown (C) weapons have an ideal range of Close; Thrown (M) weapons have an ideal range of Medium. Attacking with a Thrown weapon uses an AGI + Throwing test (or the weapon's listed skill).
- **TRANQUILIZER X:** Inflicts damage normally but does not cause Critical Hits. If the attack deals enough damage to inflict a Critical Hit, the target must pass an END + Survival (or Body + Other) test at difficulty X or fall unconscious for 1 hour (targets reduced to 0 HP automatically fail and fall unconscious). Does not affect targets immune to Poison or wearing a full suit of Power Armor.
- **TWO-HANDED:** Must be held in both hands to use effectively. Attempting to attack with a Two-Handed weapon using only one hand increases the attack difficulty by +2.
- **UNDERWATER:** When attacking with this weapon while submerged underwater, no underwater attack penalties apply.
- **UNRELIABLE:** When attacking with an Unreliable weapon, increase the complication range of the attack by 1. A weapon cannot be both Reliable and Unreliable.

Weight: 4, Cost: 99, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.44 Magnum Round	Physical	6	1	Close	Vicious	Close Quarters

The .44 pistol is a double-action revolver, chambered to use the .44 Magnum cartridge. It's a powerful gun, though not as customizable as other handguns. Due to their simple, rugged design, they're prized by their owners, but not so uncommon as to be truly rare.

FLARE GUN

Weight: 2, Cost: 50, Rarity: 1

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Flare	Physical	3	0	Medium	-	Reliable

A Flare gun is a break-action single-shot device not really designed to inflict damage. Rather, it shoots signal flares which are used by many factions to signal for assistance by firing them high into the air.

NO SUPPORTED MODIFICATIONS

ASSAULT RIFLE

Weight: 13, Cost: 144, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
5.56mm Round	Physical	5	2	Medium	-	Two-Handed

This gas-operated rifle is a common sight across the wasteland, and well-liked because of the low recoil and reasonable accuracy, and the ease of modifications. Most versions found are only capable of semi-automatic fire, but the weapon is easily modified for automatic fire.

Weight: 11, Cost: 117, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.45 Round	Physical	5	2	Medium	-	Two-Handed

A pre-War weapon found across the wastelands and used in large numbers by various aggressive factions. Combat Rifles are a rugged and adaptable design, able to be modified to fill a variety of different battlefield roles.

Weight: 11, Cost: 87, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Shotgun Shell	Physical	5	2	Close	Spread	Two-Handed, Inaccurate

Combat shotguns are shotguns intended for an offensive role, typically by a military force; they're ideal for close-range fighting in tunnels, within buildings, or through the ruined streets of old cities.

SUPPORTED MODIFICATIONS

HUNTING RIFLE

Weight: 10, Cost: 55, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.308 Round	Physical	6	0	Medium	Piercing 1	Two-Handed

A bolt-action rifle commonly found in the hands of super mutants and raiders. The simple design made them common amongst hunters and survivalists before the Great War, and they're endlessly customizable. It seems fanciful to suggest that the simple short-barrelled slug-thrower carried by a super mutant could be turned into a precision sniper's rifle, yet that describes the hunting rifle perfectly.

Weight: 9, Cost: 39, Rarity: 1

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Shotgun Shell	Physical	5	0	Close	Vicious, Spread	Two-Handed, Inaccurate

Before the Great War, double-barrel shotguns were mainly used for hunting and home defense, and this has changed little. They are break-action and come in an either a side-by-side or over-and-under barrel configuration. Simple to make and maintain, these shotguns are seen frequently in the Commonwealth and the rest of the wasteland.

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.308 Round	Physical	5	0	Close	Piercing 1	Unreliable

A makeshift weapon usually seen in the hands of those who cannot make, buy, or scavenge anything better. Pipe guns are crude and somewhat unreliable, yet effective enough. Bolt-action models chamber heavier rifle rounds, trading rate of fire for power and simplicity. Special: You cannot fit both a grip and a stock at the same time. Adding a stock changes the weapon type from a pistol to a rifle.

PIPE GUN

Weight: 2, Cost: 30, Rarity: 0

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.38 Round	Physical	3	2	Close	-	Close Quarters, Unreliable

A crude, homemade weapon normally seen in the hands of those who cannot make, buy, or scavenge anything better. Pipe guns are rough and somewhat unreliable, yet effective enough. The most common model is a simple semi-auto pistol chambered for .38 rounds, though enterprising souls convert them for automatic fire or sniping. Special: Adding a stock changes the weapon type from a pistol to a rifle.

PIPE REVOLVER

Weight: 4, Cost: 25, Rarity: 0

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.45 Round	Physical	4	1	Close	-	Close Quarters, Unreliable

Like the other forms of pipe gun, the pipe revolver is a makeshift or homemade gun, in this case modelled after a revolver. It strikes a balance between the stopping power of the pipe bolt-action, and the fire rate of the pipe gun, and its improvised nature makes it similarly suited for modification. Special: Adding a stock changes the weapon type from a pistol to a rifle.

25MM GRENADE APW

Weight: 8, Cost: 420, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
25mm Grenade	Physical	4	1	Long	-	Two-Handed, Blast

The 25mm grenade APW is a semi-automatic grenade launcher. Specifically, this weapon contains a stock magazine capacity of six grenades, a brisk rate of fire, decent accuracy and allows modifications. While the grenades are much smaller and less impactful than those found in many other grenade launchers, the weapon itself is not as cumbersome as larger grenade launchers.

ANTI-MATERIEL RIFLE

Weight: 20, Cost: 560, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.50 Round	Physical	8	0	Long	Piercing 1	Two-Handed

Utilizing an ergonomic, metallic skeleton design with a free-floating barrel, the anti-materiel rifle is a bolt-action, high-caliber precision weapon intended for use against materiel and hard targets. The weapon is designed for use at long ranges and should ideally not be fired while standing up due to the heavy recoil. Rare and highly sought-after, these guns are ideal for dealing with things like deathclaws, the larger radscorpions, and other sizeable threats... so long as you've got time to set up the first shot.

BLACK POWDER BLUNDERBUSS

Weight: 3, Cost: 90, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.50 Ball	Physical	7	0	Close	Spread	Two-Handed, Unreliable

An archaic percussion-cap firearm, of a kind possibly salvaged from museums or the collections of reenactors. They fire a heavy .50 musket ball propelled by gunpowder, and are only effective at very close ranges, but when they do hit, they can do a lot of damage.

NO SUPPORTED MODIFICATIONS

BLACK POWDER RIFLE

Weight: 6, Cost: 60, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.50 Ball	Physical	8	0	Medium	-	Two-Handed, Unreliable

An archaic percussion-cap muzzle-loading rifle, of a kind possibly salvaged from museums or the collections of reenactors. The rifle's longer barrel gives it considerably longer range and slightly more stopping power than its smaller counterparts, but while it's fine against one or two foes, the slow rate of fire and long reload process make it inconvenient when heavily outnumbered.

SUPPORTED MODIFICATIONS

MUZZLE	Bayonet

BLACK POWDER PISTOL

Weight: 3, Cost: 60, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.50 Ball	Physical	7	0	Close	-	Unreliable

An archaic percussion-cap firearm, of a kind possibly salvaged from museums or the collections of reenactors. Compared to the blunderbuss, the pistol is less inaccurate and has a slightly longer effective range, but it packs no less of a punch.

NO SUPPORTED MODIFICATIONS

GAUSS SHOTGUN

Weight: 14, Cost: 400, Rarity: 5

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
2mm EC Round	Physical	7	0	Close	Spread	Two-Handed

Technically more of a volley gun than a shotgun, as it fires multiple shots from multiple barrels at once, the gauss shotgun is a rare and devastating weapon which peppers a target with hypervelocity rounds.

SUPPORTED MODIFICATIONS

CAPACITOR	Capacitor Boosting Coil	Full Capacitors
BARREL	Shielded Barrel	

LEVER-ACTION RIFLE

Weight: 9, Cost: 201, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.308 Round	Physical	7	0	Medium	-	Two-Handed

As the name suggests, a lever-action rifle uses a lever to cycle the weapon's action; this is typically part of the trigger guard, allowing the shooter to cycle the action with minimal effort or movement. Though this slows the rate of fire, it's a reliable design that stands up to use, time, and nuclear war.

BOARDING PISTOL

Weight: 9, Cost: 55, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Grappling Hook	Physical	5	0	Medium	Piercing 1, Special*	Inaccurate, Unreliable

This improvised boarding gun is fitted with metal barbs attached to an industrial cable and a miniature winch built into the frame. Once anchored in a solid surface, the winch pulls with enough force to reel a grown adult toward the anchor point. Some raiders and hunters also use boarding guns to snag prey. * When a boarding pistol hits a target, the target must pass a STR + Athletics (character) or Body + Other (creature) test at difficulty 2. On a failure, you may spend a minor action to knock the target prone and pull them one zone closer to you. A snagged target may spend a minor action to break free. Additionally, boarding guns can be used to pull the wielder up to two zones at a speed of one zone per turn.

MAGNUM MONICON

Weight: 6, Cost: 0, Rarity: 5

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.44 Magnum Round	Special	8	1	Medium	Piercing 1	Close Quarters

The Magnum Monicon deals all types of damage. Apply damage as usual, then reduce it by the target's lowest damage resistance (Physical, Energy, Radiation, or Poison) at the point of impact. Special: When attacks with this weapon reduce a creature or non-robot character to 0 HP, they die immediately and their corpse begins to mutate horrifically. If you spend 3 AP, the slain target rises on your next turn with half of its maximum HP and gains immunity to Radiation and Poison damage. The risen target acts immediately after you in the initiative order and obeys your commands. At the end of the current scene, it melts into a radioactive puddle, leaving behind a stomach-churning cloud of green vapor.

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Energy Cell / Fusion Core	Energy	3	6	Medium	Burst, Piercing 1	Two-Handed, Gatling, Inaccurate

A high rate-of-fire laser weapon, the Gatling laser uses several rotating barrels fired in quick succession to produce a devastating fusillade of laser pulses. While the individual laser pulses lack in stopping power, the sheer mass of them can wear down almost any target. Gatling lasers can operate from any sufficient power source, and while fusion cells can be used to power them, the rate-of-fire means that they are often quickly expended. Most users instead rely on a larger power source, such as a fusion core.

HEAVY INCINERATOR

Weight: 20, Cost: 350, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Flamer Fuel	Energy	5	3	Medium	Spread, Burst, Persistent	Two-Handed, Debilitating

Like a flamethrower, a heavy incinerator also propels ignited fuel mixtures to burn a target. However, the heavy incinerator differs in that it appears to lob a succession of fireballs at the target, lobbing them in an arc like a grenade launcher. These fireballs burst upon impact, spreading flames as the fuel splashes off the target.

NO SUPPORTED MODIFICATIONS

JUNK JET

Weight: 30, Cost: 285, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Anything	Physical	6	1	Medium	-	Two-Handed

The Junk Jet is a makeshift heavy weapon which fires anything. Any items loaded into the weapon's hopper are hurled with deadly force from the business end of the gun. Naturally, this makes it quite useful in situations where random junk is abundant but actual ammunition is scarce. Special: When you fire the Junk Jet, choose any item you are currently carrying; that item is fired by the gun. Choose one additional item for each additional shot of ammunition spent by the attack. Items must be small enough to be held in one hand and loaded into the hopper. At the end of the scene, roll 1 CD for each item fired from the Junk Jet; on an Effect, that item survived the attack and can be reclaimed.

MISSILE LAUNCHER

Weight: 21, Cost: 314, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Missile	Physical	11	0	Long	-	Two-Handed, Blast

A refined, highly adaptable multipurpose missile weapon introduced into the American arsenal, the modular launcher is smaller and more maneuverable than the earlier model. It consists of the two-part launch tube, firing mechanism, mounting brackets; open battle sights and a mount for a guidance system. It is a breech-loading weapon, reloaded by lifting the front section of the launch tube and sliding the 72mm fin-stabilized missile inside. The rear part of the tube is designed to safely disperse launch gasses, allowing it to be launched from confined spaces. Other forms and designs of Missile Launcher exist across the wastelands, but this form is common enough that most consider it the standard.

.50 CAL MACHINE GUN

Weight: 31, Cost: 350, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
.50 Round	Physical	7	3	Medium	Burst	Two-Handed, Inaccurate

These machine guns, chambered for the powerful .50 round, are extremely effective against infantry, materiel, lightly armored vehicles, boats, buildings, aircraft, and a wide range of other targets. This design has been in use in one form or another since long before the Great War but finds a new lease of life when carried by Power Armored fighters who can wield the cumbersome gun.

BARREL	Heavy Barrel	Heavy	Damage: +1 ; Gain "Vicious" effect	+3	+35	Gun Nut 2

AUTO GRENADE LAUNCHER

Weight: 30, Cost: 450, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
40mm Grenade	Physical	6	2	Long	Burst	Two-Handed, Blast

The automatic grenade launcher (sometimes referred to as a grenade machine gun), is a belt-fed, blowback-operated, air-cooled automatic weapon designed to lay down a heavy volume of explosive ordnance and support infantry and vehicle operations. Designed for use as a crew-served weapon, the automatic grenade launcher was intended for use against a variety of targets ranging from infantry and light vehicles to fortifications and other materiel. The sheer weight of the weapon and bulk of the ammunition limited its versatility, until the advent of Power Armor. Since then, many units were converted for use on foot, rather than from a tripod.

GATLING GUN

Weight: 20, Cost: 350, Rarity: 1

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
5mm Round	Physical	3	3	Medium	Burst	Two-Handed, Gatling, Inaccurate

Originally referred to as "Gatling's battery gun", these weapons resemble an old-fashioned version of a minigun, with the rotating barrels operated by a hand-crank rather than an electric motor. Naturally, this means that it has a slower rate of fire than its more advanced counterpart, but the weapon is no less functional for its old-fashioned design.

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
2mm EC Round	Physical	6	3	Long	Burst, Piercing 1	Two-Handed, Gatling

The Gauss Minigun is a powerful, automatic ballistic weapon that rapidly fires hypervelocity 2mm rounds that deal devastating damage. Given their scarce ammunition and the sheer rate of fire it possesses—particularly when modified—this is a powerful weapon that demands a wealthy and well-supplied owner. It can even be fitted with a Tesla coil, charging rounds with electricity as they're fired.

Tranquilizer Dart	Poison	4	3	Medium	Tranquilizer 3, Persistent, Burst	Inaccurate, Two-Handed

For those times when a single dart is not enough, this tranquilizer submachine gun can turn several enemies at once into truly… exceptionally calm pincushions. Side effects may vary. Vault-Tec is not responsible for loss of taste, touch, motor functions, or death caused by an overdose of tranquilizer.

NO SUPPORTED MODIFICATIONS

GATLING PLASMA

Weight: 24, Cost: 1000, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Plasma Cartridge	Energy and Physical	4	4	Medium	Burst	Two-Handed, Gatling, Inaccurate

An evolution of plasma gun technology, the gatling plasma is a rare, potent, and costly weapon to use. Like smaller weapons of its kind, it inflicts damage through a combination of both physical impact and thermal transfer, and like other gatling weaponry, it inflicts this damage via a rapid-firing collection of rotating barrels that spray huge numbers of shots at the enemy. The relative scarcity of plasma cartridges, or extremely rare plasma cores, and the rate at which this weapon consumes ammunition, means that keeping the weapon supplied for use can be a full-time job. Special: Plasma weapons inflict both Physical and Energy damage. Roll damage as normal, then reduce the total by whichever of the target's damage resistances is lower out of Physical or Energy. Any Persistent damage effects inflicted by weapon mods deal Energy damage.

ENERGY GUNS

LASER MUSKET

Weight: 13, Cost: 57, Rarity: 1

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Fusion Cell	Energy	5	0	Medium	Piercing 1	Two-Handed

The laser musket is a homemade form of laser rifle, blending advanced technology with strangely primitive mechanisms, popular with militia groups such as the Minutemen. The laser musket must be manually primed, charging the makeshift capacitor through turning a hand-crank on the weapon's rear. While seemingly crude, they can make for potent sniper's weapons, especially with a modified capacitor able to hold a larger charge. Special: Firing a laser musket consumes two shots of ammunition each time it is fired. Each capacitor mod increases both damage and the number of shots consumed. You may reduce the number of shots consumed, reducing the damage by 1 CD for each shot consumed fewer than normal (to a minimum of 4 CD damage and 1 shot consumed).

LASER GUN

Weight: 4, Cost: 69, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Energy Cell	Energy	4	2	Close	Piercing 1	Close Quarters

Laser guns are high-tech weapons which emit a concentrated beam of coherent, directional light, intense enough to inflict serious damage. They were a relatively new development in the years before the Great War, and thus are not an especially common sight in the wasteland, outside of those groups who've secured old military weapons caches. Most surviving models of laser gun-such as the dependable AER9, widely used by the U. S. Army-use an internal capacitor charged by a microfusion power cell.

PLASMA GUN

Weight: 4, Cost: 123, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Plasma Cartridge	Energy and Physical	6	1	Close	-	Close Quarters

Plasma guns, or plasma casters, are high-tech weapons firing super heated ionized gas, or plasma. Powered by a plasma cartridge, these weapons are rare and potent, delivering damage through the high-speed impact of the plasma bolt and then thermal transfer as the heat from the plasma bolt is transferred into the target at the moment of impact. Special: Plasma guns inflict both Physical and Energy damage. Roll damage as normal, then reduce the total by whichever of the target's damage resistances is lower out of Physical or Energy. Any Persistent damage effects (applied by weapon mods) inflict Energy damage.

MICROWAVE EMITTER

Weight: 8, Cost: 500, Rarity: 5

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Fusion Core	Energy	6	1	Medium	-	Two-Handed, Debilitating

This advanced energy weapon generates intense blasts of microwave radiation. While it won't irradiate you—microwaves are non-ionizing radiation—it can cause intense burns as whatever is hit by the blast is heated up from the inside, boiling the water in your cells. And metal is little protection: the microwave blast can't effectively be dispersed by metallic objects, which heat up, produce electrical sparks, damage delicate circuitry. While extremely rare, these weapons provide a serious advantage when used against heavily armored targets.

ARC WELDER

Weight: 15, Cost: 370, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
2mm EC Round	Energy	3	4	Close	Burst, Persistent	Two-Handed

This odd weapon can discharge a constant, high-voltage stream of electricity. While painful and damaging to living creatures, it is especially effective against robots and enemies in Power Armor, as electricity discharges into delicate components.

NO SUPPORTED MODIFICATIONS

ASSAULTRON HEAD LASER

Weight: 8, Cost: 500, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
Fusion Cell	Energy	5	0	Close	Piercing 1	-

The head of an Assaultron contains a high-yield laser emitter, shielded behind sturdy armor plating. Assaultrons use this laser to blast the enemy as they close into melee. The laser itself uses a capacitor that can build up an extremely powerful charge, but which requires considerable energy for each fully charged blast. Due to the solid design, destroyed Assaultrons sometimes have an intact head that can be used as an impromptu hand-held laser. Special: Firing an Assaultron head laser consumes two charges of ammunition each time it is fired. Each capacitor mod increases both damage and the number of charges consumed. You may reduce the number of charges consumed, reducing damage by 1 CD for each charge fewer than normal (to a minimum of 4 CD damage and 1 charge consumed).

SUPPORTED MODIFICATIONS

SWORD

Weight: 3, Cost: 50, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	4	0	-	Piercing 1	Parry

Swords have been in use for almost as long as wars have been fought and remained widespread as symbols of status and prestige amongst soldiers-particularly officers across the world right up until the Great War. Many of the swords found in the wastelands are those used by Chinese officers during the Great War, often taken from battlefields as a trophy by American troops. Others are museum pieces or replicas from private collections, with many resembling the cavalry sabers used during the American Revolution.

SUPPORTED MODIFICATIONS

COMBAT KNIFE

Weight: 1, Cost: 25, Rarity: 1

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	3	0	-	Piercing 1	-

For both fighting and for utility uses, soldiers-and those who seek to emulate soldiers-frequently carry knives. The Combat Knife found across the wastelands is normally of the same type as was issued to U.S. Army soldiers during the Great War, a single-edged blade with a clipped point. The weapon is lightweight and sturdy, and intended for heavy use.

SUPPORTED MODIFICATIONS

TOMAHAWK

Weight: <1, Cost: 15, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	4	0	Close	Piercing 1	Thrown, Suppressed

A small, short-handled axe, akin to a small hatchet. Less subtle than a throwing knife, a hurled tomahawk can certainly make an impression in an enemy.

EXPLOSIVES

PULSE MINE

Weight: 0.5, Cost: 100, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Energy	6	0	-	Stun	Mine, Blast

A proximity-triggered mine that emits a burst of electromagnetism, devastating to machines. Special: Pulse mines only inflict damage upon robots, synths, Power Armor (though not the wearer inside), and other technological targets including computers and electronics. Against all other targets they inflict 0 damage.

NO SUPPORTED MODIFICATIONS

BASEBALL GRENADE

Weight: 1, Cost: 40, Rarity: 1

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	5	0	Medium	-	Thrown, Blast

Little more than a hollowed-out baseball filled with an improvised explosive mixture, these grenades are crude, low-tech, and easy to make, dealing a moderate amount of damage to those within the blast.

NO SUPPORTED MODIFICATIONS

DETONATOR

Weight: 1, Cost: 75, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	0	0	-	-	-

A remote detonator used to trigger placed explosives from a distance as a minor action. Special: When a Placed explosive is being set, if you have a Detonator, you may choose to wire the explosive to trigger remotely. This removes the Delay (X) quality and lets you detonate the explosive as a minor action at any point during the scene while within Long range. Multiple explosives may be linked to one detonator, increasing the PER + Explosives test difficulty by +1 for each additional bomb. When triggered, all linked explosives detonate simultaneously.

NO SUPPORTED MODIFICATIONS

DYNAMITE

Weight: 1, Cost: 25, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	5	0	Medium	-	Thrown, Blast

A stick of dynamite with a lit fuse, thrown and set to detonate on impact. Special: Single sticks of dynamite are assumed to have a short fuse that detonates on the same turn they are lit and thrown, functioning like a normal grenade. A character may prepare longer fuses with a PER + Explosives test at difficulty 1 (preparing one stick on a success, plus one additional stick per AP spent); long-fuse dynamite gains the Delay (X) quality with a rating chosen when prepared.

NO SUPPORTED MODIFICATIONS

SMOKE GRENADE

Weight: 1, Cost: 40, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	0	0	Medium	-	Thrown, Blast

A thrown grenade that produces a thick cloud of smoke, blocking sight and imposing +2 difficulty to tests. Special: When a smoke grenade detonates, it generates a cloud of smoke filling the affected zone. Characters cannot see while inside the cloud, nor into or through it from outside, adding +2 difficulty to all attacks and PER-based tests made by or against anyone within the cloud. At the end of each round roll 1 CD plus +1 CD for each round the cloud has persisted; if one or more Effects are rolled, the smoke disperses.

NO SUPPORTED MODIFICATIONS

PULSE GRENADE

Weight: <1, Cost: 100, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Energy	6	0	Medium	Stun	Thrown, Blast

Pulse grenades emit a burst of electromagnetism which inflicts massive damage to machines-such as robots, synths, and Power Armor-within the vicinity, while leaving living creatures unharmed. Special: Pulse grenades only inflict damage upon robots, synths, Power Armor (though not the wearer inside), and other technological targets including computers and electronics. Against all other targets they inflict 0 damage.

NO SUPPORTED MODIFICATIONS

MOLOTOV COCKTAIL

Weight: 1, Cost: 20, Rarity: 1

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Energy	4	0	Medium	Persistent	Thrown, Blast

Consisting of a glass bottle-normally from an alcoholic beverage—containing a flammable fuel mixture, a bit of motor oil to help it spread, and an alcohol-soaked rag stuffed in the top to act as a wick. When used, the wick is ignited and the bottle hurled at the target; the breaking bottle spreads the agitated mixture, which quickly ignites and begins to burn anything in the vicinity. Cheap and effective.

NO SUPPORTED MODIFICATIONS

CRYO MINE

Weight: 1, Cost: 50, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Energy	6	0	-	Freeze	Mine, Blast

A placed mine that freezes the area around it in a blast of cryogenic energy.

NO SUPPORTED MODIFICATIONS

CRYOGENIC GRENADE

Weight: 1, Cost: 50, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Energy	6	0	Medium	Freeze	Thrown, Blast

A thrown grenade that freezes affected targets in a cryogenic blast.

NO SUPPORTED MODIFICATIONS

BOTTLECAP MINE

Weight: 1, Cost: 75, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	6	0	-	-	Mine, Blast

The Bottlecap mine is crudely put together, yet a formidable explosive. Bottlecap mines are constructed from a simple container such as a lunchbox, filled with bottle caps and a crude explosive mixture, and fitted with a sensor and a detonator. The explosive force hurls the caps over a wide area at such speed that they are essentially shrapnel. Special: When crafting a bottlecap mine, extra bottlecaps may be added: every 10 extra bottlecaps increase damage by +1 CD. After detonation, re-roll the weapon's damage dice to determine how many intact bottlecaps can be salvaged in the blast zone.

NO SUPPORTED MODIFICATIONS

FRAG GRENADE

Weight: <1, Cost: 50, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	6	0	Medium	-	Thrown, Blast

A basic fragmentation grenade, consisting of an explosive core within a metal casing designed to shatter into shrapnel upon detonation. They're simple and highly effective. Just remember to throw the grenade, and not the pin.

NO SUPPORTED MODIFICATIONS

FRAG GRENADE MIRV

Weight: 1, Cost: 75, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	5	0	Medium	Spread	Thrown, Blast

A multiple-ploy grenade that scatters several explosive submunitions over the blast area.

NO SUPPORTED MODIFICATIONS

FRAG MINE

Weight: 1, Cost: 50, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	6	0	-	-	Mine, Blast

Similar in design and construction to a frag grenade, a fragmentation mine is instead placed on the ground and uses a pressure plate or proximity sensor to trigger detonation when someone gets too close.

NO SUPPORTED MODIFICATIONS

PLASMA GRENADE

Weight: <1, Cost: 135, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Energy and Physical	9	0	Medium	-	Thrown, Blast

A canister containing chemicals which are rapidly transformed into superheated ionized gas-or plasma-upon detonation. The blast of a plasma grenade generates vast amounts of heat which more than makes up for the lack of shrapnel or concussive shockwaves. Special: Plasma grenades inflict both Physical and Energy damage. Roll damage as normal, then reduce the total by whichever of the target's damage resistances is lower out of Physical or Energy.

NO SUPPORTED MODIFICATIONS

PLASMA MINE

Weight: <1, Cost: 135, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Energy and Physical	9	0	-	-	Mine, Blast

These magnetically sealed mines unleash a blast of energized plasma upon being triggered, searing those who tripped the mine's sensors. Special: Plasma mines inflict both Physical and Energy damage. Roll damage as normal, then reduce the total by whichever of the target's damage resistances is lower out of Physical or Energy.

NO SUPPORTED MODIFICATIONS

PLASTIC EXPLOSIVES

Weight: 2, Cost: 200, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	10	0	-	Breaking, Piercing 1	Blast, Delay (X), Placed

Malleable explosive placed on a surface, detonated remotely or by delay; the Delay rating is set when placed. Special: The rating of the Delay (X) quality is chosen when the bomb is placed.

NO SUPPORTED MODIFICATIONS

POWDER CHARGE

Weight: 1, Cost: 25, Rarity: 1

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	4	0	-	-	Mine, Blast

A small explosive charge; may be used as a mine or converted to a delayed placed device. Special: A Powder Charge may replace its Mine quality with the Delay (X) and Placed qualities, requiring a few minutes of work and a PER + Explosives test at difficulty 1. The Delay rating is chosen when the bomb is placed.

NO SUPPORTED MODIFICATIONS

FLASH BANG

Weight: 1, Cost: 40, Rarity: 2

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	0	0	Medium	-	Thrown, Blast

A thrown stun grenade that blinds and stuns those caught in its blast. Special: On a hit, every creature caught within the blast of a Flash Bang is stunned as per the Stun damage effect. If the attack misses, there is no effect.

NO SUPPORTED MODIFICATIONS

DYNAMITE BUNDLE

Weight: 2, Cost: 150, Rarity: 3

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Physical	9	0	-	Breaking	Blast, Delay (X), Placed

A bundle of dynamite sticks rigged to detonate with a delay; the Delay rating is set when placed. Special: Dynamite bundles have the Delay (X) quality with a rating chosen when the bomb is placed. Single sticks may also be thrown with a short fuse (detonating that turn), or prepared with longer Delay (X) fuses via a PER + Explosives test at difficulty 1 (+1 stick per AP spent).

NO SUPPORTED MODIFICATIONS

NUKA GRENADE

Weight: 1, Cost: 100, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Energy	9	0	Medium	Vicious, Breaking, Radioactive	Thrown, Blast

A tiny, handheld tactical nuclear weapon, a Nuka grenade is extremely dangerous to use-dropping one is ill-advised-but devastatingly effective, comparable to the mini-nukes used by the Fat Man launcher.

NO SUPPORTED MODIFICATIONS

NUKE MINE

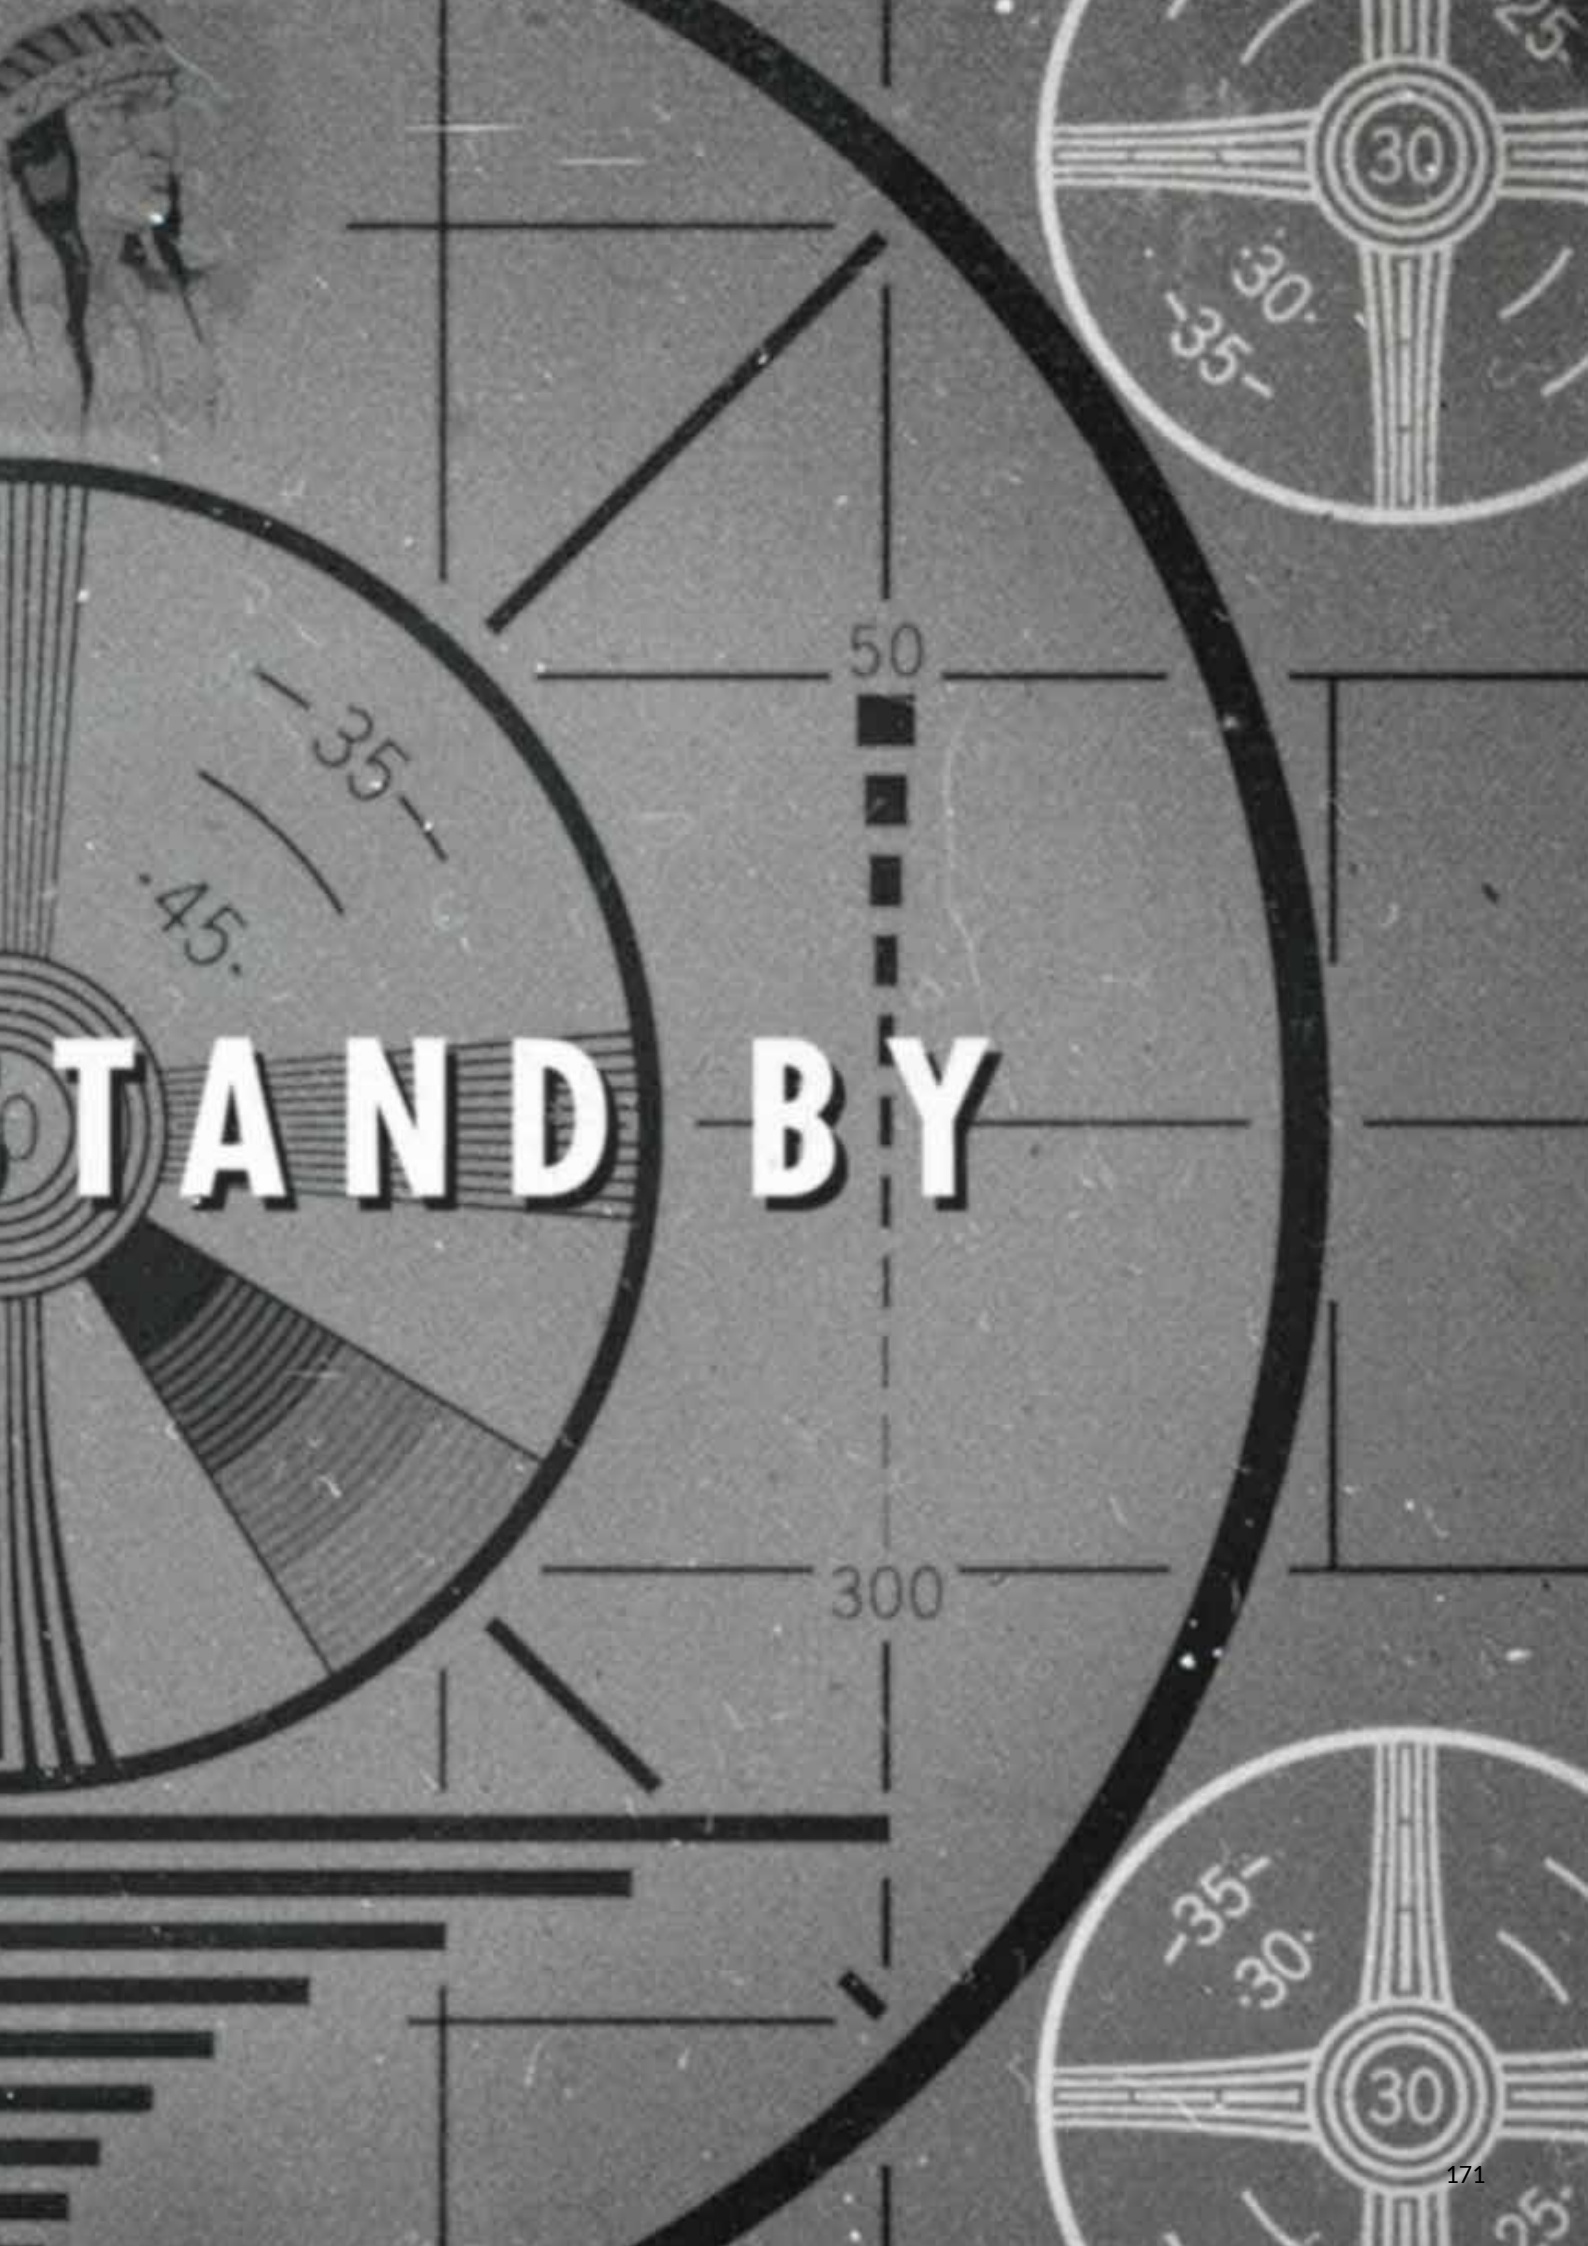

Weight: 1, Cost: 100, Rarity: 4

AMMO	DAMAGE TYPE	DAMAGE	FIRE RATE	RANGE	EFFECTS	QUALITIES
-	Energy	9	0	-	Vicious, Breaking, Radioactive	Mine, Blast

It is a nuclear variant of a landmine. The Nuke mine operates in all respects as other mines do although its explosion is more akin to that of a mini-nuke. Naturally, this means that they inflict damage from both the explosion and from the radiation the blast emits.
